Military service: exempt

Projects

Portfolio landing

It's a portfolio landing that I made it with just html css and js without using any library except using icons cdn's. it was for myself and also all of designs and other things was my idea.

[Demo link](#) [Github link](#)

Godakht

It was for my school competition and I made it with html css js and some js library. I called this godakht and that can help chemistry teachers in schools.

Nava player

I made this project to give it to my mom as a gift, it's a monojet landing that I made with html css js and it's not about my beliefs in the workplace.
